

EUROPEAN DAY 2011

Second Conference of the Initiative for Networking Regional Labour Market Observatories across Europe

Practical Approaches of Youth Monitors in Regional Labour Market Observatories

Would you like to learn more about youth monitoring in regions and localities? Do you already have experiences with the conduction of youth monitoring and are you interested in exchange with other scientists, institutes and researcher from all across Europe? Are you thinking about setting up a youth monitor but need information about indicators and methods?

Are you a scientist, a consulter, a representative of an administrative body or a politician who is involved in youth and labour policies? Would you like to learn from best practice?

The European Day 2011 is the conference to answer your questions, the opportunity for a lively exchange and the possibility to learn from other labour market observatories. Additionally it is the chance to present your results and to discuss current issues, challenges and chances related to youth monitoring.

Aside the opportunities of exchange and networking, the main objective of the conference is to identify the most relevant indicators which can be applied to monitor youth unemployment and employment in regions. Also the issue of transition from school to work on a regional or local level all across Europe or in selected regions will be covered.

Representatives from DG Employment, Social Affairs and Inclusion of the European Commission, from EUROSTAT, scientists and other experts in the field of youth monitoring will join the discussions and working groups.

Are you interested? Then join the European Day 2011, the second conference for networking Regional and Local Labour Market Observatories across Europe.

The conference is free of charge and will be held in English.
